Creating a selection box using ng options if you want to create a drop-down list, based on an object or an array in angularjs, you should use the option policy ng: var app = angular. Module ('MyApp', []); app.Controller ('MyCtrl', functure ($ scope) {Ã, Ã ¬ scope.names = ["Emil", "Tobias", "Linus"];}); Try you even, "ng-options vs. ng-repeat you can also use the ng repetition policy to make the same drop-down list: because the repetition directive Ng is repeated an HTML code block for each item in an array, it can be used to create options in a drop-down list, but the NG option policy was specially made to fill a drop-down list with options . What do I use? You can use the NG Repeation Directive and the NG-Option Directive: Suppose you have an array of objects: $ scope.cars = [Model: "Ford Mustang", color : "Red"} " {Model:" Fiat 500 ", Color:" White "}, {Model:" Volvo XC90 ", Color:" Black "}]; Using Repeat NG: you selected: {{selectCar}} try you even" the value selected will always be the value in a pair of key values. The value in a pair of key values can also be an object: The selected value will still be the value in a pair of key values, only this time is an object: $ scope.cars = {car01: { Brand: "Ford", Model: "Mustang", Color: "Red" }, CAR02: {Brand: "Fiat", Model: "500", Color: "White"}, CAR03: {Brand: "Volvo", Model: "XC90", color: "Black"}}}; Try themselves - Options in the drop-down list Do not need to be the key in a pair of key values, it can also be the value, or a property of the value object: Try you even â €" Ã »
