Against lynx, you need a weapon that is long range, do not waste your gems at an early stage, save this beast for later levels as it's too strong against lynx, I would probably say a weapon that can deal damage but also hit from far away, Ninja sword is good because of its precision which can cause a very strong hit, it can also counter his invisibility so you can hit him from distance, the best moves against lynx are strong slash and spinning slash, super slash but only if you're at right range or it won't work, spamming lynx with strong slash and spinning slash until he dies is the strategy, strong slash is forward+punch while spinning slash is back+punch, also use variety of kicks like sweeps, back kicks, forward kicks, flying kick.

Shadow fight 2 lynx vs all bosses. Best weapon to defeat lynx. How to defeat lynx in shadow fight 2. Lynx weapon shadow fight 2.
