## Viessmann vitodens 100 price

Which? Best BuyThe Viessmann Vitodens 100-W has surged in popularity since first being awarded Which? Best Buy status in 2017. The Vitodens 100-W's Best Buy status was first awarded based on feedback from 219 registered Which? Trusted Traders heating engineers and 9,610 domestic customers. This feedback covered the experiences of the boiler owners and the views of the installers in regard to the ease of servicing, fixing a common fault, availability of parts and spares, build quality and recommendations.Having also received Which? Best Buy status in 2018 and 2019, the boiler has been noted for its reliability each time.Integrated Wi-FiLaunched in April 2021, the new Vitodens 100-W notably now comes with integrated Wi-Fi. This along with the 100-W's new control platform makes commissioning and servicing the boiler easier. From an engineer's perspective, this means that they are now able to monitor and make adjustments to customers' boilers remotely using the Vitoguide software. This shortens services processes and improves customer service by showing the engineer the status of customers' systems at a glance. Here, they are able to see fault messages instantly and respond to any issues promptly.For the engineer, the compatibility with Vitoguide also makes commissioning the boiler easier and provides a step-by-step guide covering time programmes, heating circuits, heating curves, DHW and the circulation pump.For the end-user, the integrated Wi-Fi means that the Vitodens 100-W is now fully compatible with the battery-powered, RF-connected ViCare Thermostat. This means that the boiler can not only be controlled using the boiler's large seven-inch colour touchscreen, it can also be controlled using this device whilst at the property and not only that, it can also be controlled wherever you are in the world using the ViCare app on a smartphone or tablet – all without the need for third-party controls. The ViCare app provides the Vitodens 100-W with the following functionality:Information on the current operating statusQuick adjustments to the heating systemTime programmes for heating and hot water, by zoneReliability and efficiencyReliability and efficiency continue to be two of the standout qualities of the Vitodens 100-W. This is enhanced by the new Matrix-Plus burner and new Lambda Pro automatic combustion control in the 2021 Vitodens 100-W range. These technologies ensure low fuel consumption with low NOx and CO2 emissions.New for 2021 is the Vitodens 100-W's increased modulation range, with the boiler now modulating 1:10 (32kW).Whilst the new Lambda Pro automatic combustion control ensures reliable and clean operation even when the gas quality fluctuates by detecting and adjusting to the gas type. In addition to this, it offers future-proof ability with reliable and efficient compatibility if the seemingly possible happens and the UK gas grid supplies a blend comprised of 80% natural gas and 20% hydrogen.10-year comprehensive warrantyThe reliability of this boiler is then backed up by the up to 10-year comprehensive warranty available. For 2021, the mechanical design of the Vitodens 100-W has reduced the number of spare parts needed for routine maintenance by about 50%. This means routine maintenance and servicing is made easier.Whilst with a 94% efficiency rating, this boiler is one of the highest efficiency condensing gas boilers available to purchase in the UK currently. It also sits at an attractive price point compared to other boilers available in the UK. However, this is not a budget boiler option. Viessmann is one of the most technologically advanced boilers manufacturers in the world and the Vitodens 100-W benefits from the following as a result:94% efficiencyLightweight constructionCompact in sizeVery quiet operation, with noise levels of just 35dB The average price of the Viessmann Vitodens 100-W System Boiler ranges between £901.41 and £1,167.33 including VAT and excluding installation. The Viessmann Vitodens 100-W System is a gas condensing boiler that can stand up to the highest of heating and hot water demands. This system model measures 700mm (H) x 400mm (W) x 350mm (D) and comes in four different outputs of 19kW, 26kW, 30kW and 35kW to suit properties of all sizes. You won't need a cold water tank in the loft with this boiler but you will need a separate cylinder for storing your hot water. As there is a choice of output options available, Vitodens 100-W System prices vary from £901.41 to £1,181.23. The boiler comes with a standard 5-year warranty, which can be upgraded to 10 years if you choose a Viessmann trained installer to carry out the installation. Boiler Energy Efficiency Credentials Designed to help you save on energy costs, the Vitodens 100-W System is an A rated boiler with a SEDBUK seasonal efficiency rating of 89.5%. It features a high efficiency A rated stainless steel Inox-Radical heat exchanger that boasts an efficiency rate of 98%. This appliance has a modulation ratio of 1:6 to allow the boiler to modulate down in line with your home's demand, which improves efficiency and maximises operational savings. You can also purchase optional intelligent accessories to save more energy and money, including room thermostats, 7-day timers and the popular tado° thermostat and app. Vitodens 100-W System Technology and Main Advantages Made in Germany, this model comes with a whole host of features for easy installation such as a pre-plumbing jig, safety fittings and flue lengths up to 19 metres. It's supplied fully wired and assembled, so that should help to make installation quicker as well. In addition to this, the boiler components can be accessed from the front of the unit for hassle-free servicing and maintenance. The stainless steel Inox-Radical heat exchanger not only boosts efficiency, reliability and performance but also ensures the boiler has a very long life. Viessmann is so confident about the quality of this component, the brand guarantees it against leaks resulting from corrosion for a full 10 years. You'll be pleased to know that the boiler is user-friendly and programmed with a clear backlit LCD touchscreen display to enable you to control settings and temperatures even when the appliance is sited in a poorly lit area. It's also set up to be used with an optional external weather detector, which allows the boiler to react to outside conditions and adjust temperatures accordingly. Furthermore, the Vitodens 100-W System is an extremely quiet unit that can be kept in or near a busy room. Is the Viessmann Vitodens 100-W System the Right Boiler Type and Size for Your Home? With four outputs on offer, the Vitodens 100-W System is suitable for homes of all sizes, as well as properties with a hot water cylinder and more than 1 bathroom because it can provide a constant supply of hot water to all of your taps at the same time. It's also a good solution for homes with little or no loft space as there is no need for a bulky cold water tank. As a general rule, smaller dwellings with smaller needs will require the lower output options and larger homes with higher demands will need to choose one of the higher output units. Like we always say, you will need to ask a Gas Safe engineer to take a look at your property and assess your typical usage habits to ensure you pick the right kilowatt size boiler. Your friends won't be impressed that you've bought a Viessmann Vitodens 100-W, but you will. The Which? Best Buy award is usually reserved for the Worcester-Bosch and Vaillant's of the world, much like the Ballon d'or is seemingly reserved for Messi and Ronaldo but an unlikely German has got a look in this time around. In the boiler world, at least. What's more, Viessmann boilers took the #2 spot in our list for the best combi boiler to buy in 2021. Result. Got your heart set on a Viessmann Vitodens 100? Controls & Features of the Viessmann Vitodens 100-W A unique and standout feature of the latest Vitodens 100 is the Lambda Pro technology, which was previously only available in the 200 range. This ensures the gas valve constantly adjusts to the air and gas mix it receives, making sure it maintains maximum efficiency and burn rate. The latest Vitodens 100 also includes an updated LCD touchscreen display with integrated Wi-fi, allowing you to control, diagnose the boiler and enable remote access to Viessmann support so that they can assist from afar and diagnose faults. The touchscreen display also expands on the usual error code system and actually shows you which components have failed and may be causing the fault. This helps to alleviate the costs associated with diagnosing faults using a generic and broad error code. Warranty: 5/5 The warranty is a major part of buying any new boiler as if something goes wrong you will want the reassurance that it will be repaired and back in working order as soon as possible. The great news is that when you purchase your Viessmann boiler with Heatable, you will receive a 10-year warranty.
