SharePoint

From Wikipedia, the free encyclopedia

SharePoint is a web-based application that integrates with Microsoft Office. Launched in 2001,^[8] SharePoint is primarily sold as a document management and storage system, but the product is highly configurable and usage varies substantially between organizations.

Microsoft states that SharePoint has 160 million users across 75,000 customer organizations.¹⁴

An HTML attribute describes the characteristics of that element.Here's a breakdown of how elements, tags, and attributes work together: HTML tags contain instructions on how to display an on-page element. To do this, all you need is your web browser.To view your webpage's HTML, you should: Right-click while on your webpage in Google Chrome Click 'Inspect' You'll see the HTML code in a box at the side or bottom of your page Use Ctrl + F to find particular tags or elementsTo check if your website uses HTML tags correctly, you can do an SEO audit of your site. You'll typically use unclosed tags for metadata or line breaks. Although this guide is all about HTML tags, it's important to know the difference between HTML tags, elements, and attributes.An HTML element is an item on the page; it's part of the web page's content. An HTML tag affects how an HTML element appears. Select "Start Site Audit." The tool will notify you when the audit is complete.Upon completion, you'll be directed to the Site Audit overview report, where you'll have a high-level view of any site issue:Select the "Issues" tab for a more detailed view of any HTML issues. The tool also provides suggestions on how to fix each issue:Final Thoughts Understanding HTML doesn't have to be complicated. Put, HTML is the language of web pages. How Do Web Pages Read HTML Tags?Servers read HTML code to understand and render content. You can use tags to format italics, line breaks, objects, bullet points, and more. These tags live in the HTML (or the Hypertext Markup Language) of every webpage. They begin with a < and end with a > and precede and follow the content of the element. That means that the HTML tag does not need to be closed with a < />. With the cheat sheet in this guide, you should identify and implement HTML tags for your web pages. Need more details on HTML attributes and how to fix them? If you already have a project, select the "Site Audit" option from your project dashboard.The tool will prompt you to enter your target domain and configure any additional settings:Use the tool settings to set the crawl scope, disallow URLs, or provide additional website access. Understanding each HTML tag is a crucial step to implementing your own HTML code.Use this guide as a reference for standard HTML tags and how to use them.HTML tags are simple instructions that tell a web browser how to format text. Here is a list of the most common HTML tags: Tag Type What It Is HTML Text Tags Paragraph HTML Text Tags Heading 1 HTML Text Tags Heading 2

HTML Text Tags Heading 3 HTML Text Tags Heading 4 HTML Text Tags Heading 5 HTML Text Tags Heading 6 HTML Text Tags Strong HTML Text Tags Emphasis HTML Text Tags Abbreviation HTML Text Tags Contact Information HTML Text Tags Override The Current Text Direction HTML Text Tags Content From Another Source HTML Text Tags Title Of The Work, Book, Website HTML Text Tags Inline Quotation HTML Text Tags Display A Part Of Programming Code HTML Text Tags Text Inserted HTML Text Tags Text Deleted From The Document HTML Text Tags Term Defined Within A Sentence/Phrase HTML Text Tags Keyboard Input HTML Text Tags Preformatted Text HTML Text Tags Sample Output Of A Computer Program HTML Text Tags Variable Name Used In Mathematical Or Programming Context HTML Text Tags Single Line Break HTML Text Tags Division HTML Link Tags Anchor Tag For A Link HTML Link Tags Base Url For All Relative Url Within The Document HTML Image And Object Tags Image HTML Image And Object Tags Area Of An Image Map HTML Image And Object Tags Image Map HTML Image And Object Tags Parameter For An Element HTML Image And Object Tags Embed An Object HTML List Tags Unordered List HTML List Tags Ordered List HTML List Tags List HTML List Tags Description List HTML List Tags Term In Description List HTML List Tags Definition/Description Of A Term In Description List For a full list of all 100+ HTML elements, visit this helpful guide from javaTpoint.If you already have HTML tags on your web pages and want to check if they're used correctly, you can do so by looking at the HTML of your page. However, there are a few essential HTML tags and rules you'll need to follow. An HTML tag must contain three parts: An opening tag — this will start with a < > symbol Content — the short instructions on how to display the on-page element A closing tag — this will end with a symbolHowever, some HTML tags can be unclosed. Try our guide to HTML Attributes.For more information about doing a site audit and checking your site's HTML, check out our guide to doing a full SEO audit in 18 steps. It will read the HTML from top to bottom, much like how you're reading this guide. You can use as many or as few tags as you like to format content. Third-party tools like the Site Audit tool can check if the basic HTML tags and attributes are correct and if your pages use too much HTML.To perform an SEO audit with the Site Audit tool, you'll need to create a project for your domain first. (Bold Tag) HTML Attributes provide additional information about HTML elements and appear at within the HTML tag (e.g.). Type HTML Tags HTML Elements HTML Attributes Contains Instructions on how to display an on-page element The on-page content to be displayed Additional information about the on-page elements Appearance It starts with < and ends with > Sandwiched within an HTML tag Appear in the starting tag before any elements Paragraph Tag The and are the HTML tags and "Paragraph Tag" is the HTML element, i.e. the on-page text. This tag formats any text between the opening tag and the closing tag as a standard paragraph or main body text. In this example, and are the HTML tags and "Heading Tag" is the HTML element, i.e. the on-page heading.
