Top PCMAC PCMAC Dishonest from TurkeyLady3 (PCMAC user) This app and Kings other Candy Crush app are rigged and totally dishonested at 2198 level and level 3726 on Candy Crush both levels levels to make them impossible to beat C'ods Ability to it No fortune just scammed I want you to pay your real money to buy booster to beat these levels that have been intentionally made from them to be unbeatable after what I think I am a predetermined quantity of attempts sometimes in the years 100 or more will only damage a winning screen, I have played lots of free boosters that are not doing anything good, so because they are still here to keep keeping warning players to not get into their dishonest apps that is my only reason not to delete both of them donÂ € "I believe you believe me to go to the Internet inserted in the name of the app and a number of level and read other players say that Manton gono this because the players get tired and bored to play the same level hundreds of times so that bubbles the boosters encourages them to keep who eat moves on the levels sometimes at half or more you will know that if you go online and throw levels there ~ will show video hints to beat that level when you see the video you will see that the video had many more moves than you or have added blockers or reorganized the level donÂ € â, ~ â € "I Remove my word to look like this Do you need to score performance? * Update * The functionality I described below went out of the game. Thank you for this. But now I can't send lives to the person who selected outside the list of people. I can select 1 person, but the game chooses someone else off the list. I don't know how to change it, and it's very annoying. I like this game. I played for a long time. And I like a good challenge of a difficult level sometimes. What I don't like is the need to score performance. Before the game held track of the number of attempts you need to cancel a level. I don't understand the need for this, because different from what makes me feel stupid for needing 35 attempts to cancel a level, it did nothing. Nothing to earn or lose by keeping track. That feature is removed from the game now, but now they show accuracy, target and canceled lines. But still, nothing to gain or lose. Different from taking a sense of incompetence again. So why add it to the game? Why not add a function to win gold? Because as well as spending real money in the game, which I refuse to do, there is no way to get gold in the game. I love this Latinodds game (PCMAC user) my game go to Quick Kickback on my phone. Yes, it becomes frustrating sometimes and you may have to take a level several times, but you don't have to pay money if you have patience and how the thrill of trying a different way to level until it passes. Most games exploit vast majorities want to instant gratification. Oh my God I didn't exceed the level after 4 attempts! What I do?? OK, I spend \$ 5 for more gold to add balls !! Do not do it. Sit down and simply have fun. You have to pay to play I love this game, it's fun and stimulating and a big time when you have 10 minutes or an hour (lol) to kill but it is so annoying because you can't unlock certain levels unless you pay in Cash for gold or that or make you wait a whole day (24 hours) before unlocking the next levels. Gold earnings while completing levels, but when your piggy bank is full it is not possible to collect our use none of your gold until you pay \$ 3 to open the piggy bank for your 50 pieces of gold. And this is a purchase for piggy bank. Every 50 pieces is \$ 3. Furthermore, you cannot buy booster Without your gold you have to pay in cash even if you earn it through playback. Don't worry about this review if you weren't blocked by the next levels and I didn't want to pay to unlock them. they. they.
