Carrom Disc Pool is a simple & easy multiplayer board Android Game. Bowl all items before your competitor. With gameplay which has easy controls & good physics, travel around the globe & perform against powerful opponents. Carrom uses the very same methods as billiards. You will want to shoot balls at the pockets in this situation, they are called discs. But unlike billiard, 4 players may take part in a Carrom game. You all have preferred disks with the equivalent in quantity you will need to shoot at any of the four holes. And the table is squared shape so that it's really more short than the usual table. Additionally, a user can simply shoot the primary disc in a specified place. You can only target the disks which you will need with another colour or pattern out of other people to differentiate them. If you carelessly shoot the other user's disks to the pit, then they make that score too. That is the reason why this game requires you to be accurate & tactical in the direction that you shoot the disks. The initial person to hit his disks to the hole wins the game! It is possible to bet a specific number of coins & you're going to win everything if you win the match. This allows the games more interesting since you are playing with genuine people in realtime.
