## Iit jee differential calculus questions pdf

Differential Calculus is the easiest part of calculus in JEE Mains Paper and there is no doubt in the fact that the topic is scoring too. The topic is very interesting and consists of 6-7 questions in the paper that totals to 28 marks in the overall marks distribution of the paper. Some of the topics are Differentiation, Tangent and Normal, Maxima and Minima, Differential Equations, Limits, Continuity and Differentiability etc. These topics are quite fascinating but involve concepts which must be understood properly. It is the most scoring part of the IIT JEE Mains Paper. Read JEE Main Mathematics Syllabus Minimum of 6-7 questions will be asked in the JEE Mains Paper from Differential Calculus. The weightage of the marks of Differential Calculus in JEE Mains is 28 marks. Some important topics from Differential Calculus are Differentiation, Limits, Continuity and Differentiability, Differential Equations, Tangent and Normal, Maxima and Minima etc. Must Read: Important Topics from Differential Calculus in JEE Main The table below provides important topics from Differential Calculus that have consistently appeared in JEE Main along with the number of questions and distribution of marks. Topics Number of Questions Marks Limits, Continuity and Differentiability 3 12 Differential Equations 1 4 Differential Calculus 1 4 Application of Derivatives: Tangent and Normal, Maxima and Minima, Area and Volume etc. 2 4 Below given are some of the detailed topics along with the questions based on Differential Calculus for the IIT JEE Mains point of view. Limit of a Function Suppose  $f: \mathbb{R} \rightarrow \mathbb{R}$  is defined on the real line and  $p, L \in \mathbb{R}$ . Then, we can say that the limit of a function  $f$  is  $L$  if For every real  $\epsilon > 0$ , there exists a real  $\delta > 0$  such that for all real  $x$ ,  $0 < |x - p| < \delta$  implies  $|f(x) - L| < \epsilon$ .
