The war in the galaxy has always been the subject of film producers, and game developers choose to be the core theme to attract viewers or players. Most of the content of this war comes from the intelligent, powerful, yet extremely aggressive alien creatures with the ambition to dominate the galaxy. It can be said that the conflict with aliens is always a never-ending battle. So, the fact that we humans stand up to fight and protect the galaxy's peace is always a mission, a dedication honored by the whole galaxy. And surely the experienced gamer still remembers the games of the Arcade flight shooters genre for a while. Although this gameplay is not new to many players, with many features enhanced by modern game production technology today, the game of Arcade flight shooters have now returned and continues to create. A craze in the gaming community. In this article, I will introduce to you a fascinating aircraft shooting game developed on the mobile platform – Space Shooter: Galaxy Attack. At the hands of the Onesoft game developer. Space Shooter promises to bring players moments of entertainment after hours of hard labor. Context Like most previous Arcade flight shooter games, Space Shooter brings players to a specific context in the distant future. During this period, human technology has developed and improved a lot more than before, especially in aerospace. People at that time were able to conquer and reach distant stars. But all problems stem from this. Since humans have developed both technology and armed equipment with great firepower, mankind has entered the stage of discovery and encounter new life on earth. But instead of being friendly, they have the ambition to invade the earth and the entire galaxy around us. An Alien legion has been dispatched and destroyed many of our galaxy protection squads. During this devastating war, you – the elite warrior – have been chosen to become the guardian of the galaxy and sail the most modern, powerful ship with the mission to quell the unique ambition of the Aliens. From now on your mission will be to accompany your teammates, along with other friendly aliens fighting against evil aliens. Can you command your fighter against the evil aliens to protect this beautiful galaxy? Gameplay Basically, Space Shooter has a gameplay similar to that of the Arcade flight shooter games previously produced. That is, the player will play the role of a commander controlling a spaceship to fight aliens. Besides trying to shoot down enemies with available firepower, gamers must also try to fly subtly to avoid enemy fire. Not only was the enemy's firepower extreme, but their movement and speed were also very fast and unpredictable. So the player must put all his concentration to control the spaceship to avoid the rain of bullets and attacks from the enemy. Besides, players can also pick up power items to increase firepower and defense for the ship. It will be difficult to dodge the entire rain of enemies, so the game has adjusted and redesigned the game to give players the true entertainment feature of a Flight shooter. Features In addition to bringing the nostalgia of the game arcade flight, shooter hit one time, the developer of the game Space Shooter did not forget to integrate the new feature in the game to increase the experience exciting for players. First, the game impresses many gamers with extremely diverse and rich weapons and spacecraft systems. After each mortal and challenging battle with aliens, players will receive a reward corresponding to the amount of money the player has picked up on the way. With this bonus, players can buy and unlock more new weapons, new fighters with strength and armor increasing over time. At the same time, the power comes from new weapons and new fighters that will help players to overcome difficult levels. Also, the game owns a new and extremely attractive PvP mode. This is a mode that helps players interact with other players in the international arena. It can be said that there are very few Flight shooter titles that possess this new feature, so this is an advantage that makes "Space Shooter" more attractive to players than similar games. Graphics The graphics of Space Shooter is a difference that makes the game stand out in the eyes of many gamers. When starting to learn about this game, perhaps many players also realized that the improvement in visuals and special effects was the key point that made the game popular among veteran gamers. favored. The light effect coming from each bullet fired looked eye-catching. Besides, the motion effects in the game have also done very well its role in giving players a new and interesting experience. Also, the enemy system and goals in the game are highlighted and different, making each battle with the Boss more dramatic and breathtaking than ever.
