Tri state family practice clarkston wa

Skip to content Home>Tri-State Family Practice & Internal Medicine A well-child visit is when parents check on their child’s health to make sure they are growing and developing properly. Well-child visits usually start a few days after children are born and continue into adulthood. Our providers can treat a broad range of issues, including but not limited to allergies, asthma, pediatric diabetes, and more. During a well-child visit, your doctor will:Perform a physical examGive necessary shots (immunizations or vaccinations)Track how a child is growing and developingDiscuss illness prevention, diet and physical fitness, and health and safety issuesDiscuss how to handle emergencies and sudden illnessA well-child visit is the best opportunity to bring up any worries about a child’s growth and development, especially if a child is not reaching important milestones. These visits give your child’s doctor a chance to find and treat any concerns early.
