APOE 3.13: How to recover and manage stones and maps to quickly switch to ATLAS level 8! Intro: (00:00) To Know: (00:30) Atlas Level 0, Prime Maps: (02:55) Atlas Level 1 to 4: (06:23) Atlas Level 4 to 8: (14:16) What to do regardless of your atlas level: (15:16) Last word: (16:00) As a preamble to explain the method to release and correctly manage the clock stones, here's what you need to know: each bonus card goal it gives you a 1% probability of finding a higher level card will therefore be fundamental to have the largest number of map bonuses, in order to give you cards. For example, it will be very easy to drop the T13 maps, T14 by doing a T12 with a sixty lens of completed bonus objectives. You can only download the maps available on your Atlas will therefore be impossible, for example, drop a T12 if you don't see it on paper. On the other hand, you will be able to release only the T12 cards displayed on the card. I advise you to always kill the map head, often drop a map or even a master mission. The underlying method allows you to optimize the stones of the watch in order to release useful maps and never run out the maps. As soon as you have finished the history mode with the epilogue, you will be able to start the maps. The goal will be to reach the peripheral regions of the Atlas. It is divided into 8 regions, four internal and four external. The first conquerors are the ones who will find the stones. The second edge of the Central region, north-east: Lex proxima outer, South-East Region: Lira Arctus External Region, North-West: Nova Vestra External Region, Northwest: Fracture of Haewark Outer, Northeast Region: Lex Ejoris Atlas's start is suddenly simple enough, you will need to chain the different maps > E The following steps: Create each new map with the minimum magic rarity (through a transmutation sphere). If you don't have a new map, map, they're from Zana. Do your Zana missions to discover new maps Avoid duplicating a map already validated. Collect all maps you find, consider using a filter. Selling is the same map in three copies to get a new higher rank. You should have all the maps necessary to reach the outermost regions and start laying the eggs conquerors. Once you reach outside regions and have made a map or two in them, you should lay the conquering eggs.

Each appears after three maps activated in its region (it is not necessary to complete the map, but I recommend, see "Good to know"): Baran the Crusade, lightning drop the Warlord, physical damage Veritania Redeemer. Ice damage Al-Hezmin, Chaos damage This is what I recommend you to simply improve your atlas: keep making the improved white maps in magic. Make updated maps yellow in rare (blind alchemy) As soon as you kill a conqueror, put their Watchstone in the area where you killed them. Buy maps from Zana as necessary and complete your missions. Continue mapping the area and insert watchstones until © Not all four of them have gathered. After completing a region, that is to say, you have found all the stones in the region: Remove the red map of the region with the 4 watchstones to allow the next region with the 4 watchstones to take over. If you have more than 4 watchstones, remove the extra watchstones to reveal the wings. At the beginning of the map, the stone reward will be sufficient, then it will be necessary to put one for each place. Place at least 1 stone in each place if you have required numbers in the map, otherwise you won't be able to move. If you have two or more stones in the same place, you can call them back. I have completed my region 1, have stored the map, I stored the region 1 and replaced my map with the standby stones as indicated above, and I managed my map of the region that has just been emptied of its stones from the moment I have enough bonuses, I would almost certainly fall a one from the right region. I use this in my new region to start releasing maps from the region that interests me. If you have ever finished the map interesting for the region: he launches a map from another region of at least Tier 10. Visit Zana to see the stock of red maps. Make the rituals that will give a lot of booty and potentially fall a map. Optionally buy one of the right levels by a player. Remember if possible to finish the rare corrupt red maps, to add the Drop map bonus. Be careful, these are often complex and you will probably die if you have no powerful equipment. In case of doubt, use them when your experience bar is almost empty (to avoid losing too many XP due to repeated deaths). Stone guard number To generate the storage of the conquerors to the left of the Atlas Once you have canceled more regions, Buddy Sirus will arrive to join the party and will be accessible as soon as you killed each of the conquerors. It is obviously very difficult to fall, and if you really have the chance to resort to a Siro murderer service through the chat / global 820 in 1. I still advise you to learn the mechanics of the head and the practice fallen, because it's okay if you don't kill him, you won't have the potential for the map. But if you want to go further, you must be able to kill him. If you have a good strategy to capture the map, you can sell the maps of him for sale if you are short, but normally if followed the guide you should be full! For comparison, in Atlas Level 4 with 90/164 I follow from 2 to 3 maps of third parties 14 + , it is also a great way to make money if you want to sell them to the players. This is directly related to the rise of the level of the Atlantis, but here is what it recommends you to progress well: always do Proc Proc Maven, if you need this Maven guide for Jun missions, they give you a lot of experience as well as very interesting processing changes Once this map level is well integrated, the improvement of your Atlas will be done very quickly and without any problems. Just remember to follow this method because © All points are important! If you have a problem or misunderstanding, do not hesitate to post a comment! Of Alchemists, January 2021 2021
