And in his final battle with Lord Voldemort, Harry explained the significance of this to his adversary, and to us: 'Snape's Patronus was a doe,' said Harry, 'the same as my mother's, because he loved her for nearly all of his life, from the time when they were children'. Draco Malfoy's patronus is never
mentioned in the Harry Potter series, and there is no canon information about what form it might take. However, some fans have speculated that his patronus could be a dragon, given his surname and his interest in dragons, which is shown in the series. Patronus Analysis 036 Wild Cat If your patronus is the wild cat then you are intelligent and guick thinking you often outsmart those around you. 1 Harry Potter's Stag Harry's Patronus, a stag, is certainly the most prominent in the series (and among the best Patronuses in the Wizarding World), as well as the
strongest Patronus in the films. Who had the rarest Patronus? The albatross is the rarest Patronus on our list; the one belonging to the lowest number of Wizarding World fans. With the longest wingspan of any bird - up to 11 feet - the albatross surfs the ocean winds for hours, hardly even needing to flap. What is Sirius Black's Patronus? The fifth
year was boring for Sirius. Except for the fact that he had mastered the Patronus Charm, -his patronus was a black German Shepherd, and became an Animagi, -which was the same as his patronus, the fifth year wasn't very interesting. Powerful Wizards Can Conjure Multiple Patronuses It happens very quickly and is basically never shown again, but this is a seriously impressive feat of magic, considering it can pass us by so easily. Surely
Dumbledore can pull it off, but how many years of magical training do you need to learn something so complex? Will Hogwarts Legacy. In fact, the Patronus Charm isn't something you'll acquire at all during the campaign
That may sound disappointing to some fans, especially when you consider how iconic the magical ability is. Did Severus love Harry? Now, as firmly established, Snape was not the greatest fan of Harry, but that didn't mean that he ever stopped loving Lily. Dumbledore was surprised that Snape seemed to care for the boy. With a swish of his wand,
 Snape conjured up a Patronus - Lily's Patronus, a doe. 'Always,' he said. What is Hagrid's Patronus? In a Q&A with Harry Potter fans on Twitter, J.K. Rowling was quizzed what Hagrid's Patronus is a unicorn? The unicorn is one of the nine
possible Patronus forms for Jacob's sibling. It can be achieved by having a higher Empathy stat or choosing "Equine" as the Patronus form. Who has a crush on Malfoy? "Harry was constantly crushing on Draco. He just couldn't hide it." In the books and movies, Harry and Draco are constantly at each
 other's throats, given that Draco's parents are Voldemort supporters and the evil wizard killed Harry's parents. Who was Draco Malfoy's crush? J.K. Rowling said that Draco had a crush on Hermione Granger, but he doesn't show that, beacuse Hermione was a Gryffindor, Harry's friend, and also a muggle-born. After the Battle for Hogwarts, Draco fell
in love with Astoria Greengrass, and they had son Scorpius. What is Bellatrix Lestrange's patronus. Snape was able to produce a Patronus because a) he was not a true death eater and b)
he had happy memories of Lily in his past...and he clung to them. When it comes to Harry Potter spells, everyone has their favorites that they'd love to have handy in the real world. From summoning and levitating charms to wand-lighting and disarming incantations, all are impressive. Yet, there's one spell that is undoubtedly the most fascinating and
popular among fans, and that's the Patronus Charm. It's a powerful spell that requires a witch or wizard to visualize and hold onto their happiest memory, which conjures up a protective shield and takes the form of a particular animal associated with the individual. Audiences have often wondered what their Patronus might be, and have most likely
completed The Wizarding World's online quiz to find out. Many Patronuses belonging to various characters are both seen in action and mentioned throughout the series, and a select few are memorable due to their strength and particular character association. Wands at the ready, Expecto Patronum! 13 Cho Chang's Swan First appeared in: 'Harry
Potter and the Order of the Phoenix' (Book) Image via Warner Bros. Pictures Cho Chang (Katie Leung) is Harry's (Daniel Radcliffe) very first love interest. She previously dated Cedric Diggory (Robert Pattinson), and then Harry in Order of the Phoenix. While the film version shows Cho learning the Patronus charm as she secretly trains with
Dumbledore's Army, it doesn't actually show what form her Patronus is a swan, and that she is also one of the first students in Dumbledore's Army to successfully conjure it. A swan may not seem very threatening, but this Patronus is more powerful and important than some may
think. It complements Cho's gentle soul, as well as her emotional vulnerability, which inevitably helped her to conjure up the happy memory that powered her Patronus. Yes, it's also associated with beauty and elegance, but there's far more depth to it. Cho herself is also underestimated as a character, so this Patronus fits her perfectly. Image via
Warner Bros. Pictures Nymphadora Tonks (Natalia Tena) is a powerful Auror who fought bravely to protect Harry during Voldemort's (Ralph Fiennes) reign, and sadly, died during the Battle of Hogwarts. Her Patronus is another that is not included in the Potter movies, but is in the book version of Half-Blood Prince. In the film, Luna Lovegood
(Evanna Lynch) finds Harry on the Hogwarts Express after being attacked by Draco (Tom Felton). In the book, however, it is Tonks who finds him, and escorts him to Hogwarts safely by casting her wolf when she met and fell in
love with Remus Lupin (David Thewlis), who, of course, is a werewolf. It is a rarity, with the only other similar scenario being when Severus Snape's (Alan Rickman) Patronus changed to a doe when he met and fell in love with Lily. Tonks's feelings for Lupin are powerful enough to protect her, and this solidifies the deep connection they have, as his
 Patronus is also a wolf. Image via Warner Bros. Pictures Ron Weasley (Rupert Grint's most iconic character) is Harry's partner in crime, and plays a pivotal role in the Potter series. Harry may have been the hero and Hermione (Emma Watson) the brains, but Ron is the heart of the trio, often providing much needed levity and humor. Without Ron,
 Harry wouldn't have made it very far. His Jack Russell Terrier Patronus didn't get a lot of time to shine aside from appearing in the Room of Requirement during Dumledore's (Richard Harris/Michael Gambon) Army practice, but this Weasley Patronus is still noteworthy. Jack Russell Terriers have an energetic and adventurous nature, much like Ronn of Requirement during Dumledore's (Richard Harris/Michael Gambon) Army practice, but this Weasley Patronus is still noteworthy. himself, and his nurturing family upbringing would have provided him with plenty of happy memories to draw from and use. It's also worth noting that Jack Russell Terriers are known for chasing otters - and Hermione's (Emma Watson) Patronus just happens to be the latter. Coincidence? Most likely not. Even magic says that these two were simply
meant to be. While Ron may be the sidekick, no one should underestimate his power as a wizard. Release Date July 11, 2007 Image via Warner Bros. The horse is a beautiful and gentle creature, but also incredibly fierce and noble - much like Ginny Weasley (Bonnie Wright) herself. These qualities are equally important, and Ginny being able to
balance both makes her an incredibly strong and skilled young witch. She is a quiet achiever, but has a feisty side that comes out when provoked. As the long-time admirer and eventual love interest of Harry himself, people may disregard her, but Ginny, the only daughter of the Weasleys, has a fire within her that burns bright. Throughout the series,
Ginny displays her talent in many ways, whether it's crushing spells during Room of Requirement sessions or facing off against Death Eater Bellatrix Lestrange (Helena Bonham Carter) herself. Hermione may be the brightest witch of her age, but Ginny isn't
far behind. Her advanced magical abilities and abundance of happy memories at home would make her Patronus of arguably the most hated Harry Potter villain - and yes, that includes Voldemort and every Death Eater - might be a controversial
choice, but there's no denying that Umbridge (Imelda Staunton) is an accomplished witch, no matter how pink or evil. The sinister antagonist made Harry's life a living hell in Order of the Phoenix, taking over Hogwarts as a dictator. Her Patronus takes the form of a cat, a smart and observant creature, and these attributes helped Umbridge with some
of her most despicable schemes. While the thought of what her happy memory might be is utterly disturbing (for all we know, it is most likely when she tortured Harry or other students), it obviously works extremely well, as it managed to keep a large pack of Dementors at bay while she worked at the Ministry of Magic in Deathly Hallows: Part 1.
Unfortunately, in the complex wizarding world, dark magic can be just as powerful as light, as Umbridge and other Potter willains prove. Any spell conjured by Hermione Granger, the smartest Harry Potter witch of her age, and perhaps all ages, is bound to be powerful. As the top student in all of her classes, she is an encyclopedia of wizarding
knowledge. She is also wise and confident beyond her years in her magical abilities, and her skills are often what end up saving Harry and Ron's lives. Hermione has always been the brains behind the operation, and arguably the real hero of the Potter films. Hagrid (Robbie Coltrane) sums it up in Chamber of Secrets when he says "They've yet to think
of a spell that our Hermione can't do." Her Patronus presents itself as an otter, which is no surprise, as these animals are known for being clever and independent. Hermione also has a rich selection of happy memories to draw upon, particularly from her time at Hogwarts with her two best friends, as well as her Muggle parents. She was mastering
difficult spells even during her first year at Hogwarts, so really, the Patronus is likely a piece of cake for her. Image via Warner Bros. Luna Lovegood is an eccentric and special witch. She is constantly underestimated and has experienced a lot of sadness in her life due to the death of her mother. However, her quirky and carefree nature makes her
extremely unique and powerful. She was one of the few people who stood by Harry's side and believed him when Voldemort had returned, which says a lot about her as an individual and as a friend. Many fans have been drawn to Luna's Patronus appears as a hare, a free-spirited animal, but also swift
and aware of its surroundings - much like Luna herself, who could easily identify the invisible Wrackspurts in Harry's head when no one else could, or see those so-called Nargles. Along with her distinct abilities, Luna possesses a positivity and warmth that would make for many happy memories to choose from. Her kind and open-minded soul would
be enough to power her Patronus itself. Although perhaps not as powerful as his brother Albus, Aberforth Dumbledore (Ciarán Hinds) is an impressive Harry Potter wizard in his own right. Aberforth lived in Hogsmeade during the Death Eater and Dementor takeover, as seen in Deathly Hallows: Part 2, which implies that his Patronus, a goat, was
strong enough to fend off these dark beings and keep him safe. At first, he is hesitant to join Harry in his fight against Voldemort, but ultimately does the right thing. Aberforth was seen using his Patronus during the Battle of Hogwarts, where he protected students by wiping out hundreds of Dementors into the night sky. The power of his Patronus is
on full display at that singular moment, making for a huge power move. Because of this, he leaves a memorable mark despite only appearing in one film. Aberforth's happy memory likely stems from his time with his late sister Ariana (Hebe Beardsall), whom he was extremely close with. Release Date July 12, 2011 Image via Warner Bros. Pictures
 Kingsley Shackelbolt (George Harris) worked as a top Auror for the Ministry of Magic, but his allegiance sided with the Order of the Phoenix after the return of Voldemort (Ralph Fiennes). He is not heavily featured in the Potter movies, but is quite prominent in the books. While his Patronus does actually appear in a key scene in Deathly Hallows: Part
1, it largely differs from the book and is easy to overlook. At Bill Weasley (Domhnall Gleeson) and Fleur Delacour's (Clémence Poésy) wedding, Kingsley sends his Patronus, who speaks in his voice, to warn guests about the fall of the Ministry. However, it does not take a particular physical form. In the Harry Potter book, Kingsley's Patronus appears
as a lynx, and also speaks in his voice. Being able to verbally communicate through a Patronus is something most wizards and witches cannot achieve. Kingsley's unique ability proves his authority and magical superiority in the wizarding world. Image via Warner Bros Lily Potter's (Geraldine Someville) magical abilities are particularly powerful in that
they all stem from her heart, especially the love she has for her son, Harry from the killing curse and save his life. It proves that the power of love is much stronger than any skill, and that it isn't a weakness, like Voldemort and dark wizards and witches would say. Her
Patronus, a doe, would also be powered by the love in her happy memories, and therefore be incredibly protective. Her husband, James Potter's, (Adrian Rawlins) Patronus is a stag, as well as Harry's, and is consequently linked to her doe. While Lily's Patronus is never seen in action on screen, its meaningful identity is revealed in the final film, as
 well as its connection to Severus Snape's (Alan Rickman) Patronus. There is no love more powerful than a mother's love, and that comes through her Patronus animals you can get in Wizarding World, and while they might not be able to transfer into Hogwarts Legacy or help you get into a particular

 shield between you and the Dementor ... a projection of the very things that the Dementor feeds upon -- hope, happiness, the desire to survive -- but it cannot feel despair, as real humans can, so the Dementors can't hurt it." As a result, Lupin says, it will only work, "if you are concentrating, with all your might, on a single, very happy memory,"
 according to the Wizarding World. There are two different kinds of Patronuses. One is a non-corporeal Patronus that can appear as "'a thin wisp' of silver that 'hovers like mist,'" according to Wizarding World. Neville Longbottom notoriously uses a non-corporeal Patronus throughout the series. However, when a witch or wizard is able to conjure a
 corporeal Patronus, it comes out in the form of an animal, and each animal is unique to the witch or wizard who conjures it. Harry, in turn, teaches his friends who join Dumbledore's Army how to conjure their own Patronuses. Here's how everyone's Patronus
comes in the shape of a stag, emphasizing his deep connection to his parents, whose Patronuses are both deer as well. No other family in the "Harry Potter" universe shares a Patronus connection in the way that the Potters do. Harry starts learning about Patronuses in "Harry Potter and the Prisoner of Azkaban" after encountering the Dementors,
dark shadowy beings that suck souls and make their victims feel incomparable sadness and despair. After his experience with the Dementors, Harry started taking anti-Dementor lessons from his teacher, Remus Lupin. During a Quidditch match against Ravenclaw, Harry casts his first corporeal Patronus when some Slytherin students were
impersonating Dementors. Harry's big moment of conjuring his Patronus came during the climax of "Harry Potter and the Prisoner of Azkaban." While he and Hermione are traveling through time, trying to save Sirius Black, Buckbeak, and themselves, Harry thinks he sees his father conjure a stag from across a frozen lake. As it turns out, the stag is
summoned by his future self. Knowing he could already do it gave Harry the confidence to conjure it himself. "Out of the end of his wand burst, not a shapeless cloud of mist, but a blinding, dazzling, silver animal ... It was galloping silently away from him, across the black surface of the lake. He saw it lower its head and charge at the swarming
 Dementors," the book reads. Much like many of the other characters in the "Harry Potter" universe, Hermione Granger conjures her very first Patronus in the Room of Requirement during a meeting of Dumbledore's Army in "Harry Potter and the Order of the Phoenix." Hermione's Patronus came in the form of a cute little river otter. These smart
creatures are incredibly intelligent, just like Ms. Granger herself. That Hermione's Patronus on her favorite animal for Granger herself. That Hermione's Patronus on her favorite animal for Granger herself. That Hermione's Patronus on her favorite animal for Granger herself.
sees much of herself in the young wizard." In The Guardian, Rowling says, "I have often said that Hermione is a bit like me when I was younger. I think I was seen by other people as a right little know-it-all, but I hope that it is clear that underneath Hermione's swottiness there is a lot of insecurity and a great fear of failure." There's nothing more
loyal than a dog. Ron may not have always lived up to his best friend Harry's expectations of him, and he certainly had moments of jealousy against Harry, and his decision to leave the quest during "Harry Potter and the Deathly Hallows: Part 1" was also a bit of a bummer. Even so, Ron's loyalty to Harry and his decision to leave the quest during "Harry Potter and the Deathly Hallows: Part 1" was also a bit of a bummer. the love of his life, Hermione Granger, always remains steadfast. So it makes perfect sense that Ron's Patronus would come in the Phoenix," while Dumbledore's Army is practicing their Patronus charms in the Room of Requirement, Ron's little dog Patronus bursts forth from
his wand. It looks like Ron's Patronus is specifically a Jack Russell Terrier, and terriers are commonly known to be incredibly loyal pets. Additionally, both Ron and Hermione's Patronuses appear during the Battle of Hogwarts. As described in "Harry Potter and the Deathly Hallows," "He saw Ron's silver terrier burst into the air, flicker feebly and
 expire; he saw Hermione's otter twist in mid-air and fade, and his own wand trembled in his hand, and he almost welcomed the oncoming oblivion, the promise of nothing, of no feeling ..." Interestingly enough, Ginny Weasley, Harry's future wife, conjures up her Patronus form in the shape of a horse. Though Ginny's Patronus animal was never
detailed in the books, in films it was a horse, which is absolutely fitting for the Phoenix" while Dumbledore's Army is practicing in the Room of Requirement is quite wild, free, and fierce. It gallops throughout the room, blazing its own path and not letting
 anything get in its way. Ginny might not have appeared that wild and free in the films, but her spirit was exactly that in the books, which is probably why Harry was so drawn to her. He is always guite hesitant and at times feels restricted, but Ginny's freeness allows him a sense of something different. Her horse Patronus epitomizes that wild feeling.
Twins Fred and George Weasley are the fun, dynamic duo of the Weasley family. The two often play pranks, get into trouble, and generally tease and terrorize their younger siblings Ron and Ginny, albeit out of love. They become a part of Dumbledore's Army in 'Harry Potter and the Order of the Phoenix" just as many others did, where they learn how
to conjure their magpies to assist in the fight against Voldemort. Like so many other things, Fred and George Weasley share the same Patronus, the magpie bird. Though we don't see that Patronus form itself in the films, Harry Potter creator J.K. Rowling revealed the animal on her Twitter account, where she wrote, "Magpies. I thought I'd said that
before? We have a saying about them in the UK, 'one for sorrow, two for joy,' as you might know. Plus, they're talkative thieves." The one for sorrow, two for joy saying cuts even deeper knowing how the Battle of Hogwarts ends with Fred's death. That wacky Luna Lovegood. The character that Harry, Ron, and Hermione were first wary of because of
her loony reputation turns into a loyal and faithful friend, as well as a creative thinker and all-around fun person. Luna never shies away from speaking the truth, even if it makes others uncomfortable. Though her weird ways might frighten others off, the central trio finds in her a good friend. Her Patronus is a small hare, aka a rabbit, and she even
manages to use the spell during an intense moment at the Battle of Hogwarts. Author J.K. Rowling gave the actress who plays Luna, Evanna Lynch, a silver hare charm that Lynch turned into an earring, something she cherishes. However, Lynch revealed that something fishy happened when she took the Patronus quiz on the Pottermore website. She
answered all of the questions but didn't get a hare at all. Instead, she got — a salmon. It's no surprise that Hogwarts Headmaster Albus Dumbledore, and numerous others on many occasions throughout the Harry Potter series. The
mythical creature superbly represents the wise, old, magical person that Dumbledore is, and its ability to reincarnate mirrors Dumbledore also invents a new way of using the charm that wasn't simply for fighting off Dementors or other evil spells. Dumbledore uses
his Patronus to communicate, sending messages via the fully formed animal. Sending messages this way was inherently "dark arts proof," as the Patronus in "Harry Potter and the Goblet of Fire" after Viktor Krum is stunned. "He raised his
 wand into the air and pointed it in the direction of Hagrid's cabin. Harry saw something silvery dart out of it and streak away through the trees like a ghostly bird," the passage reads. Harry Potter's father, James, conjures a stag as his Patronus, just like his son. However, fans will recall that it isn't just his Patronus that takes the shape of a stag as his Patronus, just like his son.  James also transforms into a stag as well. James is an Animagus, a human that can transform themselves at will into an animal. While students at Hogwarts School of Witchcraft and Wizardry James and his friends, Sirius Black and Peter Pettigrew, learn pretty early on in their school careers how to become an Animagus in support of their friend
 Remus Lupin, who is a cursed werewolf. James' ability to turn into a stag earned him the nickname Prongs, while Sirius Black goes by Padfoot for his mouse form, Peter Pettigrew is known as Wormtail for his mouse form, while Lupin earns the nickname Moony. However, J.K. Rowling indicated that James' Patronus may not have always been a
 stag. As she wrote during a live chat, "The Patronus often mutates to take the image of the love for each stronus when he was younger before he met Lily, whose Patronus was a doe. James' love for Lily makes her his happy
 thought, which could lead to his Patronus probably morphed to match hers. Of course, Lily wasn't the only one with a doe Patronus. Someone else matches hers even more tragic. Through flashbacks in "Harry Potter and the Deathly
 Hallows: Part 2," we see how he and Lily were childhood friends and that his love for her starts young. His deep feelings for Lily create a situation in which he simultaneously hates Harry, the offspring of James, but also wants to keep him safe as he was the most precious thing in the world to Lily. Snape remains a Death Eater under Voldemort's
 watchful eye as a spy and protects Harry, all while trying to work both sides. As a result, Snape's Patronus matches Lily's. His doe is just like hers, the female version of a deer, not a stag like James'. It was Snape's doe that Harry sees in "Harry Potter and the Deathly Hallows: Part 1" that leads him to the sword of Godric Gryffindor frozen in a lake
When Harry relives Snape's memories as Snape lays dying, he witnesses a conversation Snape has with Dumbledore, wherein Snape reveals his Patronus. The description of Snape's Patronus in the books reads, "From the tip of his wand burst the silver doe: she landed on the office floor, bounded once across the office and soared out of the window.
Dumbledore watched her fly away, and as her silvery glow faded he turned back to Snape, and his eyes were full of tears. 'After all this time?' 'Always,' said Snape." Professor McGonagall is also an Animagus who can turn herself into a cat. Audiences got to see her slick feline form in the very first film, "Harry Potter and the Sorcerer's Stone." So it
 makes perfect sense that her Patronus is also a cat. Professor McGonagall also uses her Patronus during the Battle of Hogwarts as a messenger Patronus in "Harry Potter and the Deathly Hallows" reads that Professor McGonagall "marched towards the door, and as she did so she raised her wand. From the
tip burst three silver cats with spectacle markings around their eyes. The Patronuses ran sleekly ahead, filling the spiral staircase with silvery lights." However, cats were also the favorite animal of the horrible Delores Umbridge, the Defense Against the Dark Arts teacher turned Ministry High Inquisitor turned Headmistress of Hogwarts who has
kitschy cat plates lining her walls and figurines throughout her office. She is notoriously cruel to students, often physically abusive, as is seen when she forces Harry to copy lines that burn their way into his hand in "Harry Potter and the Deathly Hallows: Part 1" during Umbridge's
 prejudiced interrogation of Muggle-borns. The silvery cat sits right beside her, warding off the Dementors that float in the air above the poor witches and wizards being tormented by her inquisition. Now, Nymphadora Tonks' Patronus didn't start as a wolf. In the books, Tonks first has a hare as her Patronus, like Luna Lovegood. However, like with
 James and Lily Potter, Tonks, who doesn't like to be called Nymphadora, as we all know, changes hers to a wolf to match that of her love, Remus Lupin. As is detailed in "Harry Potter and the Half-Blood Prince," "Tonks' Patronus has changed its form,' he told him. 'Snape said so, anyway. I didn't know that could happen. Why would your Patronus
 change?' Lupin took his time chewing his turkey and swallowing before saying slowly, 'Sometimes ... a great shock ... an emotional upheaval ...' 'It looked big, and it had four legs,' said Harry, struck by a sudden thought and lowering his voice. 'Hey ... it couldn't be -?' That was when Harry realizes Tonks' love for the gruff, silent, often stoic Lupin,
 whose own Patronus takes the shape of a wolf due to his lycanthropy. However, Lupin often hides the proper form of his Patronus, instead opting to have it appear on a non-corporeal form. Sure, it's a little silly that Ron Weasley's father Arthur Weasley's Patronus is a literal weasel. That's taking things a bit too literally. However, weasels are
 mischievous and fun, much like Arthur's personality. Arthur doesn't use his Patronus a lot to defend against Dementors or other Dark Arts. Instead, he uses it mainly as a form of communication. First, he sends a message about Rufus Scrimgeour's arrival on Harry's 17th birthday in "Harry Potter and the Deathly Hallows." Arthur also uses a
 messenger Patronus to let Harry, Ron, and Hemione know that the whole Weasley family is safe while they're at Number 12 Grimmauld Place. As the book describes it, "Harry drew his wand again and spun round to see a silver Patronus soar through the drawing-room window and land upon the floor in front of them, where it solidified into the weasely
that spoke with the voice of Ron's father." A few other Patronuses make their appearance in the "Harry Potter" films with some backstory from the books. Seamus Finnigan's Patronus is a fox, Cho Chang has a swan, and Ernie MacMillan has a boar. During the Battle of Hogwarts, "Harry Potter and the Deathly Hallows" reads, "then a silver hare, a
boar and a fox soared past Harry, Ron and Hermione's heads: the Dementors fell back before the creatures' approach. Three more people had arrived out of the darkness to stand beside them, their wands outstretched, continuing to cast their Patronuses: Luna, Ernie and Seamus." Professor Dumbledore's brother Aberforth, owner of the Hog's Head
Inn, has a goat, much like the goats he cared for, though that Patronus doesn't make it into the films. Also in "Deathly Hallows," Aberforth convinces a gaggle of Death Eaters looking for Harry after seeing his stag Patronus that they had seen his goat Patronus instead. Kingsley Shacklebolt also has a pretty cool Patronus — a lynx. The slick, big cat is
perfect for Kingsley. The powerful Auror drops his lynx Patronus right in the middle of Bill Weasley and Fleur Delacour's wedding. "Deathly Hallows" reads, "Graceful and gleaming, the lynx landed lightly in the middle of the astonished dancers. Heads turned, as those nearest it froze, absurdly, in mid-dance. Then the Patronus's mouth opened wide
 and it spoke in the loud, deep, slow voice of Kingsley Shacklebolt. 'The Ministry has fallen. Scrimgeour is dead. They are coming.'"  advanced wizards struggle with it. The spell itself requires the caster to visualize their happiest memory, and hold onto it very tightly. This sounds simple, but in practice can be quite difficult. The whole point of a Patronus is to ward off Dementors suck the soul and happiness out of a person, so the longer it takes an individual to cast a

 form as the caster's Animagus. The form a Patronus takes isn't automatically equal to its power, but these forms are iconic and worth talking about. Related From Horcruxes to the power of flight, here are the 10 hardest spells for any witch or wizard in the Harry Potter Wizarding World to perform. 15 Luna Lovegood Hare Luna Lovegood's Patronus
is a hare, and is first seen in Harry Potter and the Order of the Phoenix during the scene that Harry is teaching the members of Dumbledore's Army the Expecto Patronum charm. Luna Lovegood is an incredibly talented witch, and this becomes all too apparent when she's one of the first of Harry's students to be able to produce a full-bodied patronus
 Luna's experienced some real darkness in her life (including the death of her mother), and yet it's incredibly easy for her to access so many happy memories. This, along with her more general skills as a magic wielder, results in her Patronus being more powerful than most. The free-spirited hare is a perfect reflection of Luna's character, as she is
 both close to nature and easily underestimated. Luna's patronus being a hare makes perfect sense too, since they're incredibly free-spirited and intelligent creatures, just like the fan-favorite witch. Arthur Weasley's Patronus is a weasel, and is first seen in Harry Potter and the Deathly Hallows when Ron's father uses it to send a message to Harry.
Arthur Weasley isn't the best when it comes to casting spells. Indeed, he has a position with the Ministry of Magic which showcases some skill, although his expertise is with the most positive reputation in fiction, though J.K. Rowling wasn't making any kind of comment on
the kindhearted Arthur Weasley when revealing that his Patronus takes the shape of one. The weasel is often seen as sly and cunning, which doesn't necessarily reflect Arthur. However, not only does the Weasley name find its origin with the weasel, but it's also an animal that is often undervalued, which perfectly sums up Arthur's character. Ginny
 Weasley's Patronus is a horse, which suits Harry's eventual wife and mother of his children perfectly. Ginny Weasley is tough and determined, and (in the books, at least) somewhat rebellious, which means a horse patronus is the perfect choice. She's much like a horse in that she can be very calm and gentle, but also fearless and fierce in battle. She's
 was able to conjure a full-bodied patronus aged only 14 in Harry Potter and the Order of the Phoenix, which is an impressive feat. Ginny's magical abilities mean that her Patronus aged only 14 in Harry Potter and the Order of the Phoenix,
 which is an impressive feat. Ginny has proven she can face off against great dark magic wielders such as Bellatrix Lestrange, demonstrating how much like her father's patronus. Ron Weasley is one of the few characters in the world of
Harry Potter that had a corporeal form Patronus (the strongest kind). It's an impressive feat on its own, and Ron was very proud of it. Ron's Patronus perfectly suited his character. The Jack Russell terrier represents his loyalty to his friends and
family, and while Ron's very worst fears sometimes led him to run away, he always came back to them when he was needed the most. Ron's Patronus didn't get too many chances to stand out given that he was often fighting alongside Harry, though it was useful at times. Even so, the fact that it had a corporeal form says a lot about Ron's character
and his magical abilities. Related Not spells but other magical powers in JK Rowling's the Potterverse. Find out which supernatural abilities are the most useful in the Wizarding World. Of all the characters in Harry Potter, the incredibly studious Hermione Granger understandably had one of the most powerful Patronuses amongst Harry's students in
Dumbledores Army. Hermione's Patronus is an otter, an incredibly intelligent animal that is fitting to her character. Perhaps unsurprisingly, Hermione Granger had a fully formed Patronus is an otter, an incredibly intelligent animal that is fitting to her character.  playing field. That being said, many fans were left confused when it was revealed that Hermione's Patronus took the form of an otter. However, when the mammals are analyzed in more depth, the reasoning becomes incredibly clear. Otters are highly curious animals, and it's this aspect of Hermione's personality — her unceasing thirst for knowledge
 — that the animal reflects. Tonks is one of the few characters who had their Patronus change over the course of the series. This is somewhat fitting given the fact that she herself can change form at will owing to being a metamorphagus. However, it does open up some questions about the nature of Patronuses in general, and shows that their forms
 aren't fixed. Tonks' Patronus started out as a Jack Rabbit, but later, once she fell in love with Lupin, it changed to a wolf, representing Lupin's werewolf nature. Being an Auror and a member of the Order of the Phoenix, Tonks had to rely on her Patronus on more than one occasion. Being an Auror and a member of the Order of the Phoenix, Tonks had to rely on her Patronus on more than one occasion. to rely on her Patronus on more than one occasion. Her Patronus likely got the most use during the Harry Potter and the Order of Phoenix book, when she was helping to guard Hogwarts. Her Patronus pulled double duty then, acting as protection and sending messages. Of all the Harry Potter characters who had unsurprising, bordering on obvious,
 Patronus forms, few were as true to everything else about their character than Professor McCongagall's cat Patronus. Cats are a popular Patronus, though in the series two very different characters wield them. One of these is Minerva McGonagall, one of the best Hogwarts professors. McGonagall's Patronus being a cat makes complete sense, as it
 matches her feline Animagus form. McGonagall's cat Patronus hasn't had too many opportunities to shine, but as one of Hogwarts' most respected and powerful witches, it's no doubt a very powerful witch, earning the respect of
 even the likes of Albus Dumbledore. Had there been more moments with McGongagall's Patronus it's incredibly likely that it would have been revealed as one of the most powerful in Harry Potter. While a lesser-known character who isn't as prominent in the Harry Potter books and movies, Aberforth Dumbledore's patronus is known to be a goat
the Deathly Hallows novel, Aberforth used his Patronus to cover for Harry, Ron, and Hermione in Hogsmeade when the Dementors were seeking them out. This proved invaluable, and helped the trio to carry on with their mission against Voldemort. While Aberforth would also be a rpominent character in Fantastic Beasts: The Secrets of Dumbledore,
his Patronus wasn't involved. Related Voldemort and his Death Eaters favor Avada Kedavra, but some spells in Harry Potter could be considered even more dangerous than the Killing Curse! Professor McGonagall and Dolores Umbridge are polar opposites when it comes both to their personalities and their roles in the story of Harry Potter, which
 makes it somewhat surprising that both have Patronuses that take the forms of cats. While some consider Dolores Umbridge the evilest character in Harry Potter, the fact remains that she can cast a strong Patronus. In fact, she's been spotted with up to three cat Patronuses at once. Umbridge is the only character in Harry Potter who is shown to be
 able to summon multiple Patronuses Though it's hard to imagine what kind, happy memory she conjures in order to cast such a powerful spell, it's likely something twisted, and not what many individuals would consider a happy thought. Interesting, Umbridge is the only character in Harry Potter who is shown to be able to summon multiple
 Patronuses, which both speaks for her magical abilities as a witch, and — much like Tonks' patronus changing form — opens up several questions about the nature of the spell. The Auror Kingsley Shacklebolt is a relatively minor character in the Harry Potter books and movies, but he's always shown to be a powerful and capabale wizard in his own
right, and his majestic lynx Patronus is an extension of this. Kingsley Shacklebolt's lynx Patronus to warn Bill and Fleur's wedding party of the Ministry falling, and thus the resulting dangers. Without his Patronus, the Weasley wedding would
have been blindsided by the attack. Furthermore, this use of the spell showed Kingsley's ability to send his Patronus over great distances, an ability that requires even further skill. As a member of the Phoenix and the future Minister for Magic, Kingsley being so magically talented makes perfect sense. In the magical world of Harry Potter,
