This manual contains procedures for the execution of all requested service operations. They are divided into the following five basic operations: removal / installation disassembly / assembly adjustment replacement inspection simple operations that can be performed easily simply by observing the vehicle (ie removal / installation of parts, jacking, vehicle lifting, parts cleaning and I Visual inspection) were omitted. Repair procedure 1. Most repair repair Start with a panoramic illustration. Identify the components, shows how the parts fit together and describes the inspection of the visual part. However, only the removal / installation procedures that must be performed methodically have written instructions. 2. Expenses, tightening torques and symbols for oil, grease and sealant are shown in the panoramic illustration. Furthermore, the symbols that indicate the parts that require the use of special or equivalent service tools are also displayed. 3. The procedure phases are numbered and the part that is the main point of this procedure is shown in the illustration with the corresponding number. Occasionally, there are important points or more information regarding a procedure. Refer to this information during the maintenance of the related part.
