Setup is as easy as turning on your Rogers 5G Home Internet device and inserting the SIM card. The Rogers 5G Home Internet device will then automatically connect to Rogers mobile network. Next, place the device at a good location to make sure you get the best service available. You can then connect your laptop, tablet, or other device to the 5G Home Internet device directly or via WiFi using the WiFi name and password located on the sticker underneath the device. When choosing your device location, keep in mind that your 5G Home Internet device will work best when you keep it visible, upright and elevated on a shelf or table close to a window. Don't place your device in a closet. WiFi coverage and speeds throughout the home will vary based on size, material, and layout of the residence.Page 3500 GB of data at download speeds of up to 250Mbps for 5G Home Internet Gateway and up to 100Mbps for 5G Home Internet Hotspot, with upload speeds of up to 10Mbps.
