Best way to learn guitar theory reddit

We've shown you how to learn to play an instrument online in the past, but CNET's Don Reisinger has a great roundup of even more resources for the job, focusing primarily on the guitar. Chances are at one point or another, you've either purchased an instrument or considered doing so Read moreThe guide features several great web sites for polishing your guitar chops, including All Guitar Chords and Chordbook, two solid-looking resources for learning your chords. Reisinger does feature one drumming resource (which also looks really great) called VirtualDrumming if the guitar isn't your instrument of choice. If you've always been eager to teach yourself to play an instrument, both our guide and CNET's suggestions look like good places to start.Already consider yourself somewhat of an expert on your musical instrument of choice? Let's hear your best tips for getting started in the comments.Learn how to play an instrument online [CNET] Warning: There are major spoilers ahead about The Good Place. With crazy, philosophical plot twists happening every single season, The Good Place is practically made for wild fan theories. Nothing is exactly what it seems in the NBC comedy about the afterlife — including where it's set and who's who. When we left off at the end of Season 3, the supernatural being Michael (Ted Danson) was out to prove that the standards for getting into the "Good Place" (a.k.a. heaven) have become impossible to meet. He and four humans — Eleanor (Kristen Bell), Chidi (William Jackson Harper), Tahani (Jameel Jamil), and Jason (Manny Jacinto) — plus the omnipotent assistant Janet (D'Arcy Carden) have started an experiment to prove people really can accrue enough good deeds to deserve a paradisaal eternity, but not without interference from the "Bad Place" demons. Wild fan speculation about how this theoretical afterlife really works has gotten so good that showrunner Michael Schur admitted he had to stop reading about it. "I'm worried that I'll find [a fan theory] too interesting and be like, 'Oh, that's a better idea than what we have,' and I'll be tempted to use it," he TheWrap in 2018. "When the show is over, I will enjoy going back and reading all of the fan theories and everything that was written." This content is imported from {embed-name}. You may be able to find the same content in another format, or you may be able to find more information, at their web site. He'll have a lot to catch up on when he does. Reddit users have spent the past few months theorizing about what will happen in Season 4, and they have some really interesting ideas: NBCGetty Images The Good Place doesn't existThis theory has held on for a couple of seasons now, and it's only looking stronger when you consider how little we know about the Good Place. "I don't think that the 'Good Place' exists. I think that it was just made up by the 'Bad Place' in order to torture the people who end up there," dontmakenosense wrote. "They wanted to taunt everyone being tortured with the idea that if they had been just a little bit better, they could've ended up in paradise."So far, a few major pieces of info support this idea.No one has gotten into the Good Place for centuries.No one knows how to get to the Good Place. We've never seen the Good Place or someone from it on the show. It would explain why the Bad Place was so angry about the humans' escape. What if the big lie about the Good Place got found out? As for the Medium Place, is it really that "medium" after all? Mindy St. Clair's lonely afterlife seems pretty bleak, maybe minus the recent arrival of Derek. This heaven-less possibility may sound super dark, but executive producer Drew Goddard thinks it isn't as pessimistic as it seems. "I think fundamentally at its core, the show is about flawed people trying to become better people. So it almost doesn't matter," he told Newsweek. "The secrets don't matter because at its core, where they are is less important than who they are. The thing I love about the show is it's all about these characters trying to figure out their lives, and I think that struggle will continue as the show goes on."Chidi is a demonThis one's a little wild, but hear it out: Demons mistake Chidi for "Trent" in Season 3 and they could be one and the same. As Reddit user Daisoga points out, "They said he hasn't been torturing for like 800 years, and there has been a bit more than 800 reboots in the fake Good Place, so what if Chidi is actually Trent, a demon going undercover amongst humans?" This would also explain why Chidi decides to reboot his memory in the Season 3 finale — not as a way to maintain the integrity of the experiment, but as torture for Eleanor. Plus, there's an ongoing joke on the show about how no one likes moral philosophy professors ... NBCGetty Images Vicky will impersonate SimoneRemember when the demon Vicky complains that she never got to use her "excellent" Australian accent? A lot of Redditors can't get over how Simone's not-so-great Australian accent may actually indicate she's Vicky in disguise, either from when we saw her on Earth or in this new Medium Place experiment. Michael is a humanMaybe our favorite demon is not so bad after all — especially now that he's turned back on his Bad Place ways. "I always figured that this was Michael's Bad Place," says Rpres70324. " He was a human whose torture was that he was convinced he was a bad place rep and had to constantly live in a world where he could not be an effective torturer." Given that Michael is now under even more stress to prove there's something going on with the points system, it's certainly an effective form of torture. NBCGetty Images The Medium Place experiment is really still the Bad PlaceThis is another really popular theory given the ending of Season 3. Even with the involvement of the judge, the Bad Place has rigged the Medium Place experiment so that the four humans must try to earn points in pretty tortuous environment. Eleanor must deal with (effectively) losing the only person she's ever loved. Tahani has to contend with a hateful blogger, Jason must watch Janet reconnect with Derek, and Chidi has to erase all of his memories — back to a time when everything gave him a stomach ache, Mariacolbert23 points out. If everything's now worse than what was happening in the Bad Place in Season 1, what's to say this isn't another part of the Bad Place? NBCGetty Images The four humans will end up in the Medium PlaceFor the series finale, a few Reddit posts foresee our central cast of characters finishing up in a Medium Place — not the idealistic heaven presented in the show's pilot. "They get to be together in a 'Medium Place' and continue improving as people while also assisting the broken system that determined their fates for the afterlife," BanananaBoxes predicts. "Michael could fit a good judge or leader role for these determinations." For example, Zakiszak believes Chidi could help by designing a new, ethically consistent points system given his philosophy expertise. The gang could also pick back up on what they attempted to do in Season 3: helping people on Earth get to the Good Place — as long as it actually exists, of course. This content is created and maintained by a third party, and imported onto this page to help users provide their email addresses. You may be able to find more information about this and similar content at piano.io Have you ever watched your favorite guitarist shred like no other, run to the nearest guitar and think "where do I even begin with this hunk of wood?" Have no fear, compadres, because this intelligent and turnt up video will make learning guitar easy for you! With knowledge of music theory and a hilarious delivery, Mash'Allah shows beginner guitarists how to play guitar in the simplest way possible. In this lesson, Mash'Allah teaches you the E minor guitar chord. It may quite simply be the easiest chord you will learn on the guitar. You will only need 4 things: the first, second, and third strings (tuned to the pitches e, b and g, respectively) and your right hand. Simply strum from the third string downwards and you will make the E minor chord. Now, for those of you who have taken lessons on the guitar before and are scratching your head as to how you are making an E minor chord with only three strings, it is for the simple fact that you only need three pitches to create an e minor chord: E, B and G. In this lesson, you are learning the one-octave E minor chord as opposed to the commonly used two-octave E minor chord. Though Mash'Allah has made it easy for you to play the E minor chord, you will still need to practice. If you like the video, remember to like and and subscribe here for more lessons. Have fun! Learning how to play the guitar is as simple as mastering a few basic chords. This tutorial will introduce you to eight essential chords and show you how to play them properly. With practice, you'll be making music in no time and soon be ready for more complex chords and playing techniques. The A major chord (often referred to as an A chord) can give new guitarists trouble because all three fingers need to fit on the second fret on adjacent strings. Be sure the open first string is ringing clearly by curling your third (ring) finger. In all chord examples, the small gray numbers on the accompanying diagrams illustrate which fingers on your fretting hand should be used to play each note. The C major chord (also known as the C chord) is often the first chord guitarists learn. The fingering is fairly straightforward—the key is to concentrate on curling your first finger so that the first string rings open properly. The D major chord is another extremely common beginner guitar chord, one that shouldn't give you too much trouble. Don't forget to curl your third finger on the second string or the first string won't ring properly. Also, be sure only to strum the top four strings, avoiding the open sixth and fifth strings. Another chord you come across every day, the E major chord is fairly straightforward to play. Make sure your first finger (holding down the first fret on the third string) is properly curled or the open second string won't ring properly. Strum all six strings. There are situations when it makes sense to reverse your second and third fingers when playing the E major chord. As with most chords in this list, a clear G major chord depends on curling your first finger so the open fourth string rings clearly. Strum all six strings. Sometimes, it makes sense to play a G major chord using your third finger on the sixth string, your second finger on the fifth string, and your fourth (pinky) finger on the first string. This fingering makes the move to a C major chord much easier. If you know how to play an E major chord, then you know how to play an A minor chord—just move the chord whole shape over a string. Make sure your first finger is curled, so the open first string rings clearly. Avoid playing the open sixth string when strumming the A minor chord. There are situations when it makes sense to reverse your second and third fingers when playing the A minor chord. The D minor is another fairly simple chord, yet many beginner guitarists have some trouble with it. Watch your third finger on the second string; if it isn't curled properly, the first string won't ring. Be sure to play only the top four strings when strumming a D minor chord. The E minor chord is one of the simplest to play because you only use two fingers Take extra care not to allow either of them to touch any of the open strings, or the chord won't ring properly. Strum all six strings. In certain situations, it may make sense to reverse your finger position so that your second finger is on the fifth string, and your third finger is on the fourth string.
