In this page, you will find: in grade 3, nia z you learn some easy conversions between the measurement units. For example, convert a more large unit into smaller units (2 ft in 24 inches or 4 cm in 40 mm). Depending on where you live and what standards follow, students can also do this on the rema: type 36 inches as 3 feet or 300 king like 3 m. In any case, conversion problems in grade 3 must be relatively A Cies, since being able to change the measurement units in others is based on the multiplication tables, which Niños tend to be learning in 3rd grade. On the other hand, the conversions are a great application of the multiplication tables, which gives children a more complex arithmetic such as long division and longer multiplication problems, and you will find plenty of math worksheets in this section for those topics. Since the metric system is based on number 10, conversions between the units are very easy: they only involve multiplying and dividing by 10, 100, etc. On this page you will find metric conversion worksheets for length, weight, capacity and temperature. The conversion between the metric units is based on the same system (e.g. inches to feet). Conversion between units is not covered until grade 5.
